Missoula, MT 59807

File Code: 2670

Date: March 12, 1999

Subject: *Update of Northern Region Sensitive Species List*

To: *Forest Supervisors*

Enclosed is the updated sensitive species list for the Northern Region. Also enclosed is a summary of the additions, deletions, and other changes that were made regarding various species since the last revision in 1994. Please note that the sensitive plant list has been organized by state with separate listings in each case.

This update has been extensively coordinated with the Forests and the Regional Board of Directors since September 1998. Our intention is to make future list revisions at least biannually in order to prevent large time lapses during which the status of many species becomes outdated.

Questions may be directed to Bill Ruediger (406-329-3100) or Steve Shelly (406-329-3041).
