KEY:

X = known distribution species and/or habitat

? = suspected or potential habitat

* = wild and naturally reproducing stocks

+ = migration corridors only

o = offsite impacts (e.g. downstream)

r = reintroduced Central Idaho & Yellowstone populations, covered under ESA Section 10(j), and declared experimental non-essential populations, and thus are treated like "proposed" species

= no longer meet "sensitive" criteria (personal communication with Forest botanists and Dr. Duane Atwood), but no official list revision yet

This list was compiled from the following sources:

R-4 Vertebrate Sensitive Species List (August 13, 1990)

R-4 Sensitive Plant List (April 29, 1994)

Endangered and Threatened Wildlife and Plants, USDA-U.S. Fish & Wildlife Service (August 20, 1994)

Northern Goshawk - Listed as a Sensitive Species in R4 (October 31, 1991)

Miscellaneous Federal Registers

NOTE: Dates are dates the Final Rule was published in the *Federal Register*. Effective dates (ED) are about 30 days later if not listed.

x=known spp/hbtt; ?=suspected/potential hbtt; *=wild/naturally reproducing; +=migration; o=offsite; **=endangered on Humboldt
